CJD
6000

Innovation that now enables you to **print chequebooks** in real-time, at the request of your customers

The CJD 6000 is a Chequebook Printer designed purposefully for producing on-demand chequebooks at the bank branch or central processing center. While the production method of yester-years proved efficient by means of outsourcing; innovation & technology today have made it possible for financial institutions to re-engineer this process with the aim of achieving maximum operational efficiency.

With online ordering capabilities, the CJD 6000 does not geographically limit chequebook requests to its place of issue. Requests can be made in Branch A while its place of issue in Branch B. Additionally, your online banking customers can also place a request at their convenience, and later collect it from your branch or receive it in their mailbox!
